

2009-08-13 - FOR IMMEDIATE RELEASE

Todos AB joins OATH

Todos AB's award-winning eCode system has been updated to support the OATH standard for remote authentication. The membership underlines the company's commitment to providing user-friendly and trust-building online security solutions to banks worldwide.

GOTHENBURG, SWEDEN--AUGUST 13, 2009--
Todos AB has become a member of OATH (Open Authentication), an industry initiative designed to provide an open specification for strong authentication to help combat online fraud globally.

Since eCode is an open, flexible authentication platform that supports any form of authentication, including smart card readers, tokens, PKI and mobile solutions, it is natural that Todos AB includes OATH compatibility within its eCode back-end architecture.

TODOS ECODE FAMILY - THANKS TO ECODE A BANK CAN PICK AND MIX DEVICES AND MOBILE SOLUTIONS TO SUIT EVERY END-USER'S INDIVIDUAL TASTE. NOW, HOW'S THAT FOR FLEXIBILITY?

Through its OATH membership, Todos AB will provide the community with the benefits of the company's vast experience of large-scale deployment of authentication solutions to the global financial sector. Already compliant with all other key global standards, the addition of OATH support means that eCode retains its ability to provide uniquely flexible compatibility with authentication protocols.

"eCode has become widely adopted by banks around the world - largely due to the fact that it has flexibility and compatibility as its key cornerstones." Peter Gullberg, VP Product Strategy says. "By including support for the OATH standard we ensure that eCode remains fully able to meet any authentication requirements a bank might have."

Todos AB joins more than 80 other leading device, platform and application vendors and end-user customers of authentication technologies, all of which are dedicated to creating an open authentication architecture that facilitates the growth of both eBanking and eCommerce.

Todos AB helps banks and other businesses create trusted, secure relationships with their customers online. Founded in 1987, Todos designs, develops, delivers and supports security solutions for remote authentication. We have delivered 20m products to 100+ financial institutions in more than 30 countries. When trust matters, trust Todos. For more information visit: www.todos.se.
