

2009 July 7<sup>th</sup> - FOR IMMEDIATE RELEASE

## Tatra banka orders another 150,000 Todos eCode devices

Slovakian bank reaffirms its long-standing commitment to trust and security with new order.

GOTHENBURG, SWEDEN — JULY 7 2009 — Tatra banka has just ordered 150,000 smart card readers, divided between [Todos A200](#) and [Todos Signature](#). This follows an earlier order of 200,000 units for its internet banking customers.

Tatra was the first private bank to open in Slovakia and this order maintains its reputation for being a pioneer. Indeed, one of its core values is: "We come up with new solutions, support daring and innovative thought."

It is the first bank in Slovakia to offer its eBanking customers an advanced smart card reader. It allows the bank to move beyond traditional one-time passwords, with all their security weaknesses, and equip customers with a more trustworthy and more secure device. Both the A200 and Signature include the latest in strong authentication technology.

As part of Todos's standard offering, the devices will be customized with the bank's logo, color and localized manuals and on-screen text. This ensures greater user acceptance.

"Tatra's commitment to innovation shines out clearly with this order," says Ulf Dahlberg, Todos's Sales Director EMEA. "we are very happy that they have invested in the latest and most secure technologies."

"We want to offer the highest level of security and user-friendliness to our online customers," says Natália Major, deputy COO responsible for electronic distribution channels at Tatra banka, "and Todos helps us do this."
