

## Todos Argos Mini II

Secure identification of the end user and secure data transmission require smart cards of different security levels. Todos Argos Mini II handles everything from memory cards to the most advanced asymmetric smart cards for Digital Signatures within a PKI environment.

Todos Argos Mini II is a cost-efficient smart card reader for use with PKI based digital ID cards, eBanking/eCommerce (EMV cards), Access Control, Loading Electronic Purse etc. Argos Mini II has a flat design and weighs less than 100 grams including envelope, thus it is optimised for mass distribution by ordinary mail. Minimum need for support due to full Microsoft Update compatibility ensures a low life cycle cost.

Todos Argos Mini II is very small, thin and light, and need almost no desk space at all. Rubber feet provides a steady grip.

Todos Argos Mini II is very easy to install. Simply plug in the USB cable to your computer. Argos Mini II is certified by USB and listed at [www.usb.org](http://www.usb.org). Argos Mini II is approved by Microsoft Windows Hardware Quality Labs, meaning that necessary drivers are supported by Windows Update and available through Windows for 2000/Vista and XP. The USB port provides Argos Mini II with sufficient power for reading/writing all types of smart cards.

We can offer OEM/ODM co-operation for the Todos Argos Mini II smart card reader if requested.
